

Selen Hotamisliligil

I started playing bridge in high school and in medical school I met my husband through this wonderful game. In recent years, after a very busy and fulfilling medical career, I've had a chance to devote more time to bridge, and I've been blessed with many great mentors and partners. I've always loved competing but never thought I would be traveling to China to represent the Westwood Bridge Club and the EMBA in the World Wide Simultaneous Pairs Finals and also never thought about competing in the European Championship. Having seen the possibilities, I am more excited than ever about the game and want

to play an active role in promoting it, especially among the next generation of players in the New England area and beyond. For these reasons, I would be thrilled to continue serving on the EMBA Board if I were to be considered.
