

STAN PILCH

My background is as a public school teacher and principal where I focused on creating an environment which inspired all people to succeed and meet the needs of each learner based on who they were. I would bring the same values to the EMBA where we would prioritize an environment where people are excited to be a part of the bridge community. We would meet the needs of all people by balancing; enjoyment, learning and competition. As a result the game will grow in both popularity and skill level. I would greatly appreciate your vote.
